EXPERIENCE

Software Developer, Life Care, Dec 2020-Jan 2021

- I worked closely with the CEO to improve web development tools and processes.
- Implemented a customer feedback and contact system for the company.
- Created an admin panel that is responsible for overseeing activities on the website.

Data Analyst, Hash Analytics, Oct 2020-Nov 2020

- Compiled, cleaned and modeled user data using data analytics tool like pandas.
- Collected, tracked and organized data to evaluate current business and market trends.
- Analyzed and tracked data to prepare forecasts and identify trends in the market place.

Software Developer, Fessburn, May 2020-Sep 2020

- Consistently managed client needs through research and survey resulting in positive results to improve user experience.
- Worked closely with CEO to establish and deliver leads to potential customers.
- Recommended and executed plans to improve development tools and processes.
- Troubleshoot, tested and remedied issues before software deployment.

Python Developer, Coinvasity, Sep 2019-May 2020

- Improved marketing system by adding new features and infrastructure to enhance productivity.
- Tested all software prior to going live to alleviate bugs and troubleshoot issues.
- Designed user-friendly software interfaces using django framework to simplify overall management.
- Developed production, test and beta websites using various software programs.

Junior Software Developer, Delideas Solution, Nov 2018-Jul 2019

- Assisted software planning, development and testing for server, client and web-based deployments.
- Performed research and fact checking to aid in application planning and creation.
- Assessed code during testing stage to determine potential glitches and bugs.
- Coordinated specifications and requirements for project technical needs.
- Tested newly created client code for bugs and issues to determine weaknesses.

EDUCATION AND TRAINING

- Bacher of Technology
University of Ibadan
- Software Development
Coursera
- Data Analyst
Codecademy

ACCOMPLISHMENTS

- Created highly effective new telegram bot that significantly impacted efficiency and improved operations.
